```

China, India and the United States are among the countries in the world most affected by natural disasters.

Natural disasters have the potential to wreck and even end the lives of those people, who stand in their way.

who stand in their way.

of the project disaster dramatically depends on where in the world you live, The objective of the project is to human build a web application to detect the type of disaster. The input is taken from the in-built webcam, which in turn is given to the pre-trained model.

The model predicts the type of disaster and displayed on UI.
